

TECHNICAL DATA SHEET

Appearance: Gloss

Composition: Mixture of acrylic resins, waxes and additives

Brookfield Viscosity: 7,000 CPS

Water Vapor Permeability: Good

Alkali Resistance: Resistant

Dry Matter: 28%

TRAVERTINE GLASS CLEAR

Travertine Glass Clear is a water-based finishing coat used for protection of decorative plaster. It protects and preserves the surface. It is made from acrylic binders with high hardness and resistance to alkali and UV filters. It is environmentally friendly, dries quickly and has no unpleasant odor.

Surface Preparation:

No special preparation is required once Travertine White Pearl is dry. Apply the varnish in one or two coats.

Application:

Apply with a brush, roller or sponge depending on desired thickness. Dilute with water or special thinner up to max. 25%. Apply in one or two coats with 3 to 4 hours interval. Drying time: 8 to 12 hours depending on conditions.

Consumption: 10–12 m²

Dilution: up to 25% with water or WB thinner

Drying: 3 to 4 hours / fully dry and washable after 16–24 hours

Application temperature: +5°C to +35°C. Relative humidity max. 80%.

Storage: Store in dry ventilated areas between +5°C and +25°C. Do not freeze!
